Project planning and management

Respect for difference and multiculturalism

Respect for the natural environment

Showing social, professional and ethical responsibility and

sensitivity to gender issues

Criticism and self-criticism

Production of free, creative and inductive thinking

.....

Others...

.....

Production of free, creative and inductive thinking

Critical analysis of current economic situation and policy

Adapting to new situations

Decision-making

Working in an interdisciplinary environment

SYLLABUS

The course offers a detailed analysis of the contemporary Greek economy. It starts with a comprehensive critical presentation of the historical development of the Greek economy over the past 200 years. The analysis spans from the early years of National Independence in the mid-19th century to the present day. Development process and growth performance, structural changes in national output, monetary developments, economic policies, external economic and trade relations, fiscal imbalances are among the issues discussed and analyzed from a critical perspective. Particular focus is placed on the modern Greek economy, its growth and fiscal performance, its structural characteristics and economic policies in the post-EU accession period and its Eurozone membership.

TEACHING and LEARNING METHODS - EVALUATION

DELIVERY <i>Face-to-face, Distance learning, etc.</i>	Face-to-face												
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i>	Use of ICT in teaching & e-communication with students
