

aCOURSE OUTLINE: RESEARCH METHODS

GENERAL

SCHOOL	ECONOMICS AND BUSINESS		
ACADEMIC UNIT	ECONOMICS		
LEVEL OF STUDIES	UNDERGRADUATE		
COURSE CODE	OA123	SEMESTER	7th (All Majors)
COURSE TITLE	RESEARCH METHODS		
INSTRUCTOR(S)	Professor T. Metaxas		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>		WEEKLY TEACHING HOURS	CREDITS
		3	6
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>			
COURSE TYPE <i>general background, special background, specialized general knowledge, skills development</i>	SKILLS DEVELOPMENT		
PREREQUISITE COURSES:	NO (However, the course is a prerequisite for undertaking the undergraduate thesis)		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	GREEK		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	YES		
COURSE WEBSITE (URL)	https://www.econ.uth.gr/		

LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- *Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area*
- *Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework*

for Lifelong Learning and Appendix B

• *Guidelines for writing Learning Outcomes*

Upon completion of the course students will be able to:

- Understand and analyze the factors that form the methodological framework for designing and conducting a research process
- Design and implement empirical studies to investigate demand, consumption, trends or policies for a potential tourist or investment area
- Develop a framework for locating and structuring research sources/data (primary or secondary) for use in research justification and analysis
- Adequately produce a research paper
- Analyze and interpret results using statistical analysis methods

General Competences

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

Search for, analysis and synthesis of data and information, with the use of the necessary technology

Adapting to new situations

Decision-making

Working independently

Team work

Working in an international environment

Working in an interdisciplinary environment

Production of new research ideas

Project planning and management

Respect for difference and multiculturalism

Respect for the natural environment

Showing social, professional and ethical responsibility and

sensitivity to gender issues

Criticism and self-criticism

Production of free, creative and inductive thinking

.....

Others...

.....

- Search for, analysis and synthesis of data and information,
- with the use of the necessary technology
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas

SYLLABUS

This course's main objective is to present and analyze the full theoretical and empirical framework for designing and conducting scientific research. The starting point is defining the research process as the basis for development and advancement of science both theoretically and empirically. Within the course students engage deeply with the research topic, participate in research practices and evaluate research results using specific tools and both primary and secondary data. To achieve this goal the course uses various applications and multiple case studies.

Specifically the course covers:

1. Definition of the research process and different forms of research

2. Development of key parameters in designing a research approach
3. Design, development and implementation of the research process
4. Subjects, respondents and potential markets in a study
5. Types and particularities of research approaches
6. Research methods
7. Ways, means and tools for implementing scientific research
8. Finding and analysing data (primary and secondary)
9. Questionnaires: usefulness and design
10. Statistical analysis (Factor Analysis, Cluster Analysis)
11. Presentation I: Preparing a research paper
12. Presentation II: Preparing a research article
13. Evaluation of results
14. Case studies

TEACHING and LEARNING METHODS - EVALUATION

DELIVERY <i>Face-to-face, Distance learning, etc.</i>	Face to face																		
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i>	Use of the e-class electronic platform for posting: (a) lecture materials, (b) announcements, (c) exercises, case studies, and relevant articles. - Utilization of electronic media for lecture presentations (PowerPoint).																		
TEACHING METHODS <i>The manner and methods of teaching are described in detail. Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc. The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i>	<table> <tr> <th data-bbox="699 1133 1031 1173">Activity</th><th data-bbox="1031 1133 1361 1173">Semester workload</th></tr> <tr> <td data-bbox="699 1173 1031 1214">Lectures</td><td data-bbox="1031 1173 1361 1214">39</td></tr> <tr> <td data-bbox="699 1214 1031 1294">Study and analysis of bibliography</td><td data-bbox="1031 1214 1361 1294">93</td></tr> <tr> <td data-bbox="699 1294 1031 1335">Essay writing</td><td data-bbox="1031 1294 1361 1335">40</td></tr> <tr> <td data-bbox="699 1335 1031 1456">Meetings and examination of essay progress</td><td data-bbox="1031 1335 1361 1456">6</td></tr> <tr> <td data-bbox="699 1456 1031 1496">Exams</td><td data-bbox="1031 1456 1361 1496">2</td></tr> <tr> <td data-bbox="699 1496 1031 1536"></td><td data-bbox="1031 1496 1361 1536"></td></tr> <tr> <td data-bbox="699 1536 1031 1576"></td><td data-bbox="1031 1536 1361 1576"></td></tr> <tr> <td data-bbox="699 1576 1031 1653">Course total</td><td data-bbox="1031 1576 1361 1653">180</td></tr> </table>	Activity	Semester workload	Lectures	39	Study and analysis of bibliography	93	Essay writing	40	Meetings and examination of essay progress	6	Exams	2					Course total	180
Activity	Semester workload																		
Lectures	39																		
Study and analysis of bibliography	93																		
Essay writing	40																		
Meetings and examination of essay progress	6																		
Exams	2																		
Course total	180																		
STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i> <i>Language of evaluation, methods of evaluation,</i>	The course final grade is determined as follows: a) Written examinations at the end of the semester — 60% of the final grade — in Greek; essay, analysis and critical thinking questions.																		

<i>summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other.</i> <i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i>	b) Scientific research paper — 30% of the final grade. The paper should be 7,000–9,000 words, individual or 2–3 students, based primarily on international peer-reviewed literature. c) Progress meetings — 10% of the final grade. Progress meetings: 1st meeting • Structure of the paper • Core bibliography and articles • Guidance on questionnaire design (if relevant) • Division of tasks among team members • Guidance on finding scholarly work (journal publications & working papers) in international databases 2nd meeting • Submission of the first draft for comments and feedback • Evaluation of bibliography and articles • Identification of any problems • Recommendations (where appropriate) Erasmus students follow the same assessment methods, but instruction and assessment are conducted in English.
