#### LEARNING OUTCOMES

##### Learning outcomes

*The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.*

*Consult Appendix A*

- *Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area*
- *Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B*

- *Guidelines for writing Learning Outcomes*

By ending the course, students will be able to:

- Know how the economic development process operated in international scale
- Compare the character of economic development based on particular indicators, between development and developing economies
- Know and understand the classical theories of economic growth, neo-classical and structural change positions Understand how economic theories are related with several issues such as, population, human resources, education, environment etc.
- Know how the role and the importance of spatial units (cities/ regions) developed in international level
- Know how economic crises and stability policies are related with economic development.

### **General Competences**

*Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?*

*Search for, analysis and synthesis of data and information, with the use of the necessary technology*

*Adapting to new situations*

*Decision-making*

*Working independently*

*Team work*

*Working in an international environment*

*Working in an interdisciplinary environment*

*Production of new research ideas*

*Project planning and management*

*Respect for difference and multiculturalism*

*Respect for the natural environment*

*Showing social, professional and ethical responsibility and*

*sensitivity to gender issues*

*Criticism and self-criticism*

*Production of free, creative and inductive thinking*

*.....*

*Others...*

*.....*

- Search for, analysis and synthesis of data and information
- Adapting to new situations
- Working independently
- Team work
- Working in an international environment
- Working in an interdisciplinary environment
- Production of new research ideas

## **SYLLABUS**

The course aims to examine theories and economic policy proposals for developing countries. Specifically, it covers general principles and concepts, classical theories of economic growth and development (Smith, Ricardo, Marx, Mill), theories of social determination (Boeke, McClelland, Hagen), theories of economic dualism (Lewis, Fei–Ranis), dependency and industrialization theories, and certain practical issues.

The course addresses the following units:

- Definition of Economic Development

- Comparative Economic Development
- Classical Theories of Economic Growth and Development
- Development and Underdevelopment
- Population Growth and Economic Development
- Urbanization and Urban Concentration
- Human Capital, Education and Development
- Environment and Development
- Development Policies and Economic Development
- Economic Crises and Development
- Case Studies

## TEACHING and LEARNING METHODS - EVALUATION
